## February/March 2023 Kontos Kommentary

*The following commentary is produced by Tom Kontos, Chief Economist, ADESA Auctions.*

### Summary

Average wholesale used vehicle prices rose for the second consecutive month in February and well into March.

Certified pre-owned (CPO) sales also rose in February despite short supplies of late-model vehicles, as OEMs have expanded their programs to include older models and consumers look for ways to fight inflation.

### Wholesale Market Trends\*

According to ADESA US Analytical Services' monthly analysis of auction industry used vehicle prices by vehicle model class, wholesale prices in February averaged \$15,311—up 3.9% compared to January, down 5.7% relative to February [2022](#), and up 42.1% versus pre-pandemic/February 2019, as seen below. All model class segments showed average price increases for the month with the exception of fullsize vans, which were modestly down.

Average prices have continued to increase in March and stood at \$16,525 for the week ending March 19.

Further insights on wholesale price trends can be gained by holding constant for auction sale type, model-year age and mileage (the upper line in the following graph, which represents late-model units), as well as price trends for all vehicles sold (the lower line in the graph below).

## Auction Industry Monthly Average Sales Price Trends

Late-model price growth in part reflects strong demand for CPO-eligible units. Average prices for this group of vehicles have also continued to increase in March and stood at \$26,054 for the week ending March 19.

## Retail Market Trends

The monthly data presented in this section on retail used vehicle sales by franchised and independent dealers from the National Automobile Dealers Association (NADA) was not available at the time of this report. However, monthly data on certified pre-owned (CPO) sales from Market Intelligence is provided below.

CPO Sales	Jan	Feb	YTD
2019	199,634	211,514	411,148
2020	215,953	238,223	454,176
2021	201,016	209,738	410,754
2022	166,309	191,860	358,169
2023	202,074	205,906	407,980
Var - Amount			
vs. 2019	2,440	(5,608)	(3,168)
vs. 2020	(13,879)	(32,317)	(46,196)
vs. 2021	1,058	(3,832)	(2,774)
vs. 2022	35,765	14,046	49,811
Var - %			
vs. 2019	1.2%	-2.7%	-0.8%
vs. 2020	-6.4%	-13.6%	-10.2%
vs. 2021	0.5%	-1.8%	-0.7%
vs. 2022	21.5%	7.3%	13.9%

Note that CPO sales have improved this year despite wholesale supply shortages of late-model used vehicles eligible for certification. This improvement in sales is partly the result of expansion by OEMs of their certification programs to include older units. In addition, many inflation-sensitive consumers are substituting new vehicle purchases with less-expensive CPO buys.
