Mitchell Estimating MyPriceLinkSM Integration

What is MyPriceLinkSM (MPL)?

MyPriceLink is service that is utilized today to deliver real-time list pricing for GM collision parts. As of 6/22/18, Ford is planning to integrate a limited number of their collision parts with MyPriceLink, with the intent to expand this later in 2018.

The workflow and data elements for Ford MPL integration are identical to the what has been in Production since 2015 for GM.

Workflow Introduction

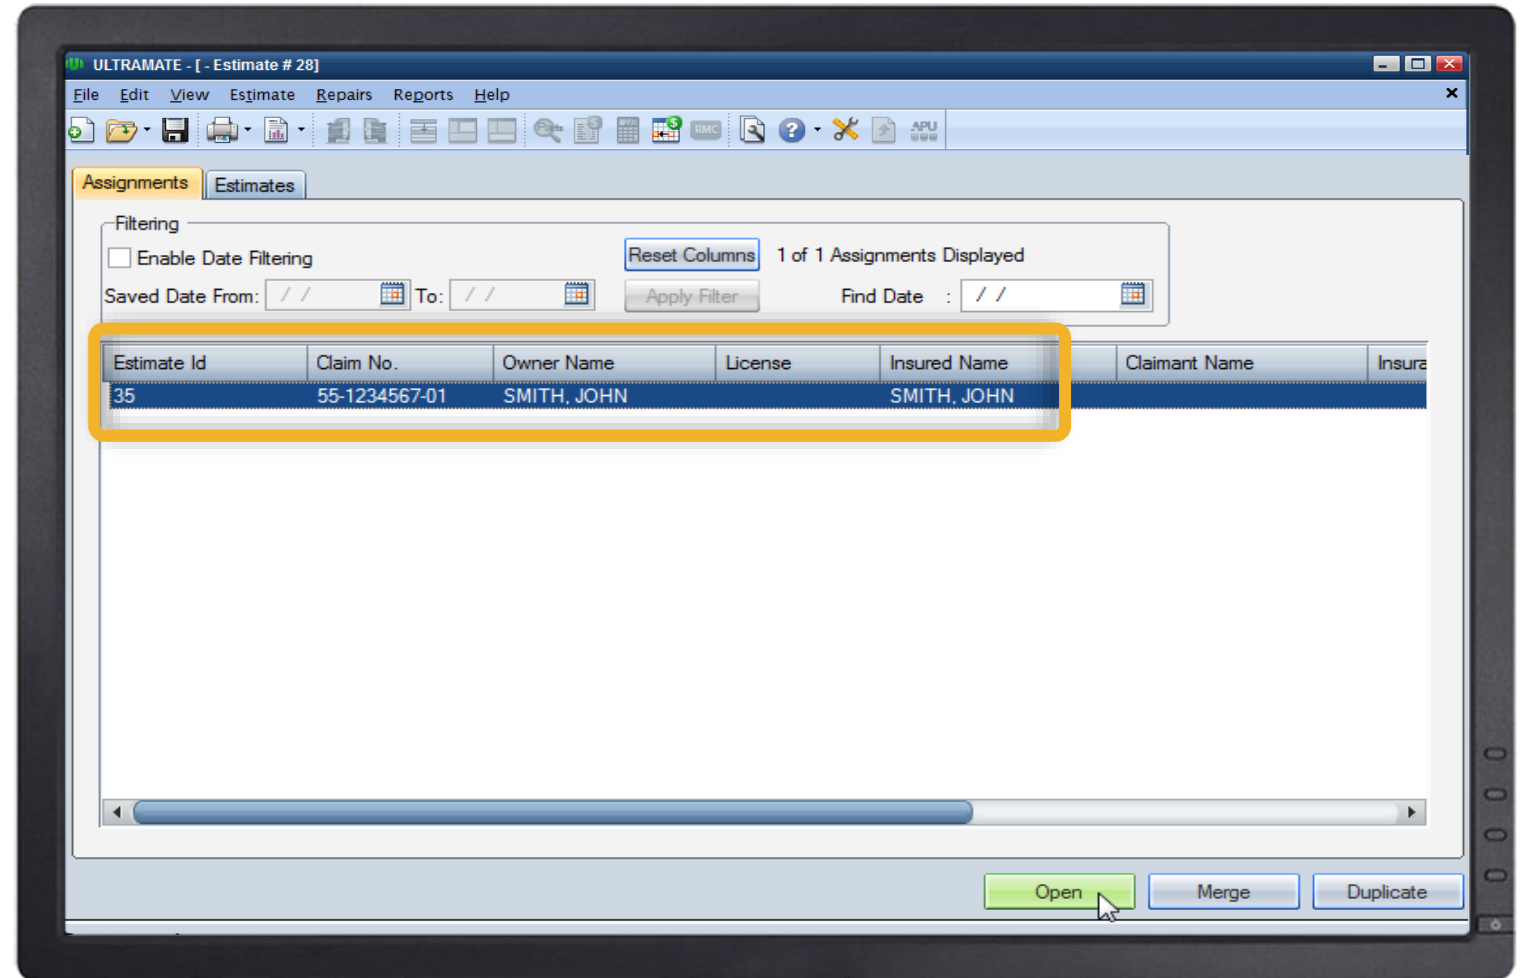

Mitchell **Estimating**

MyPriceLink Integrated Workflow

Start Estimate

Open Assignment
or Estimate in
Mitchell Estimating

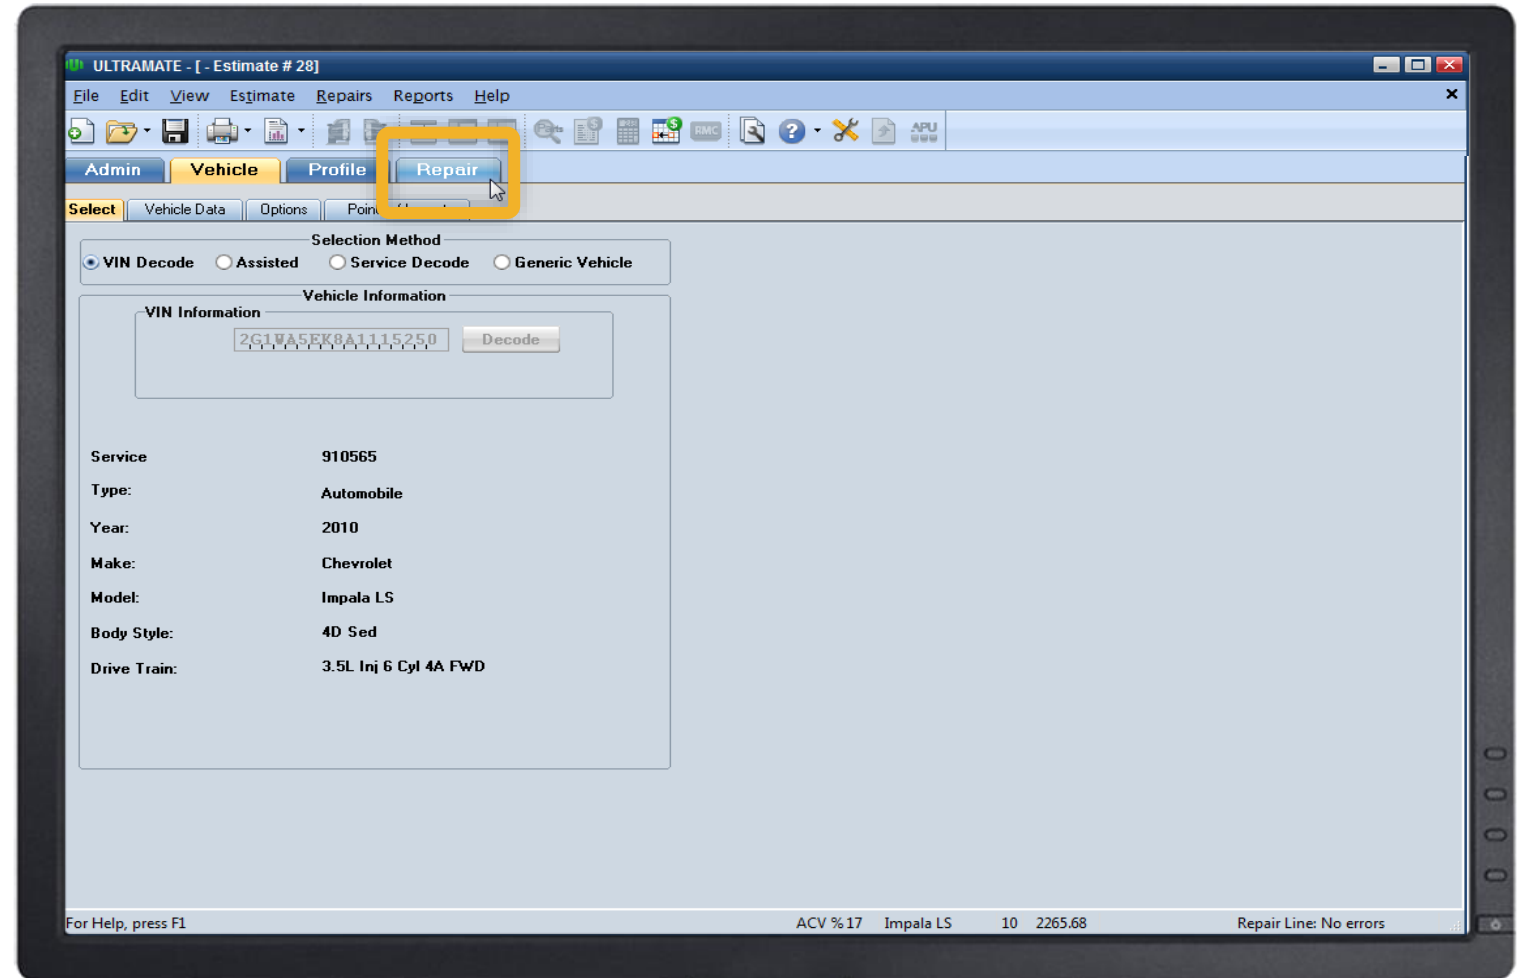

MyPriceLink Integrated Workflow

Start Estimate

After identifying the vehicle, the user clicks **Repair** tab which initiates retrieval of most current GM part prices online for import into Mitchell Estimating.*

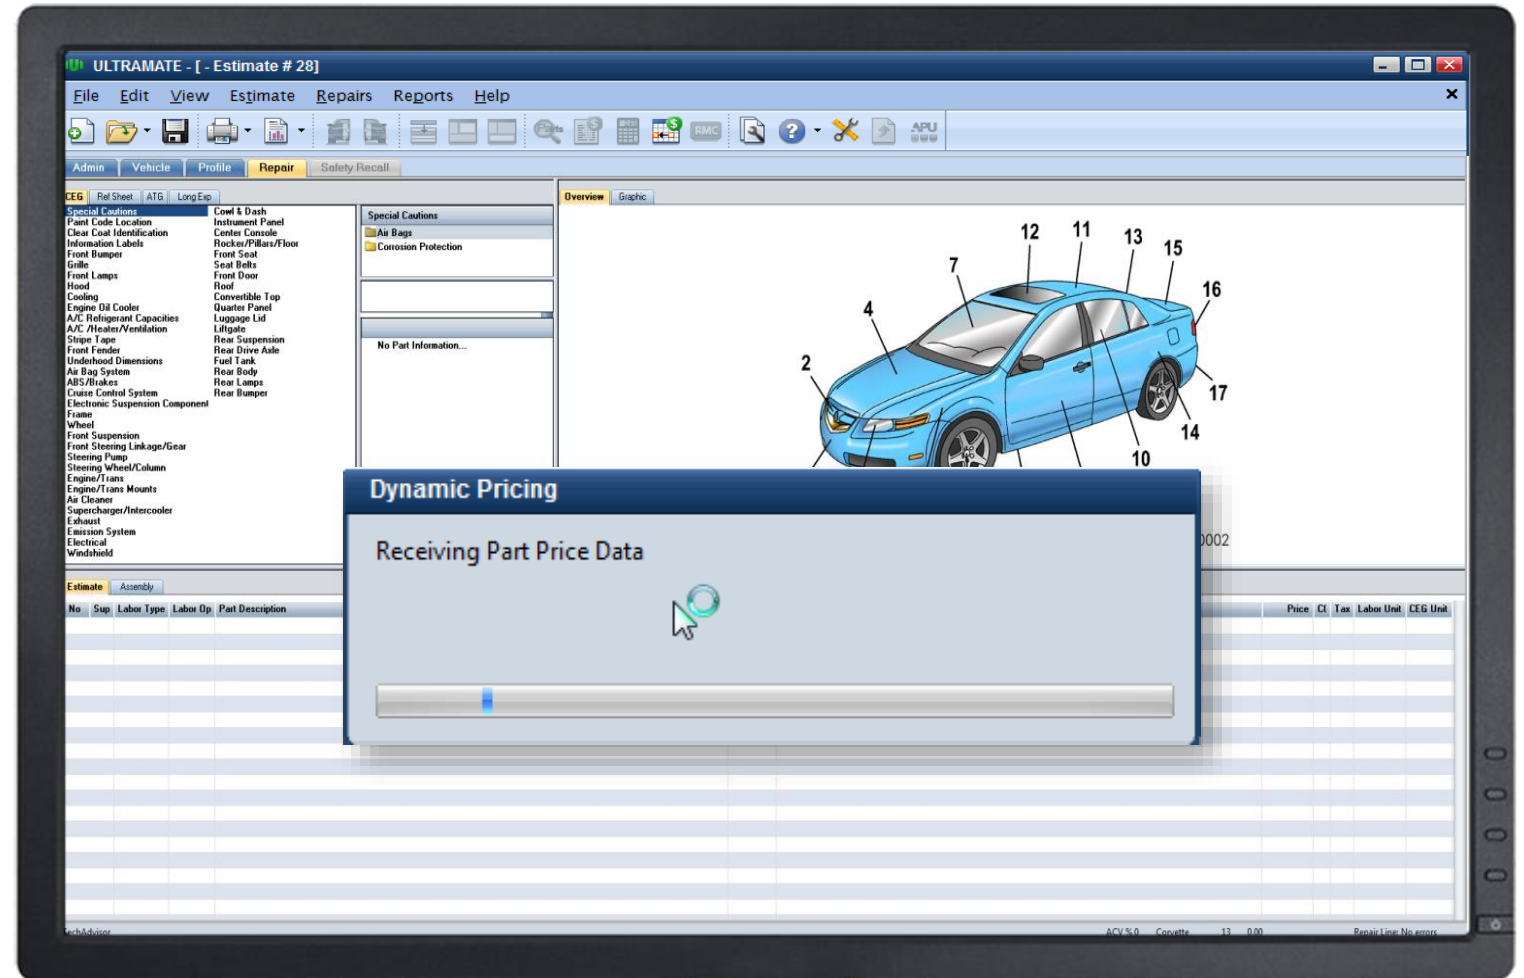

*Internet access required

MyPriceLink Integrated Workflow

Retrieve Online Pricing

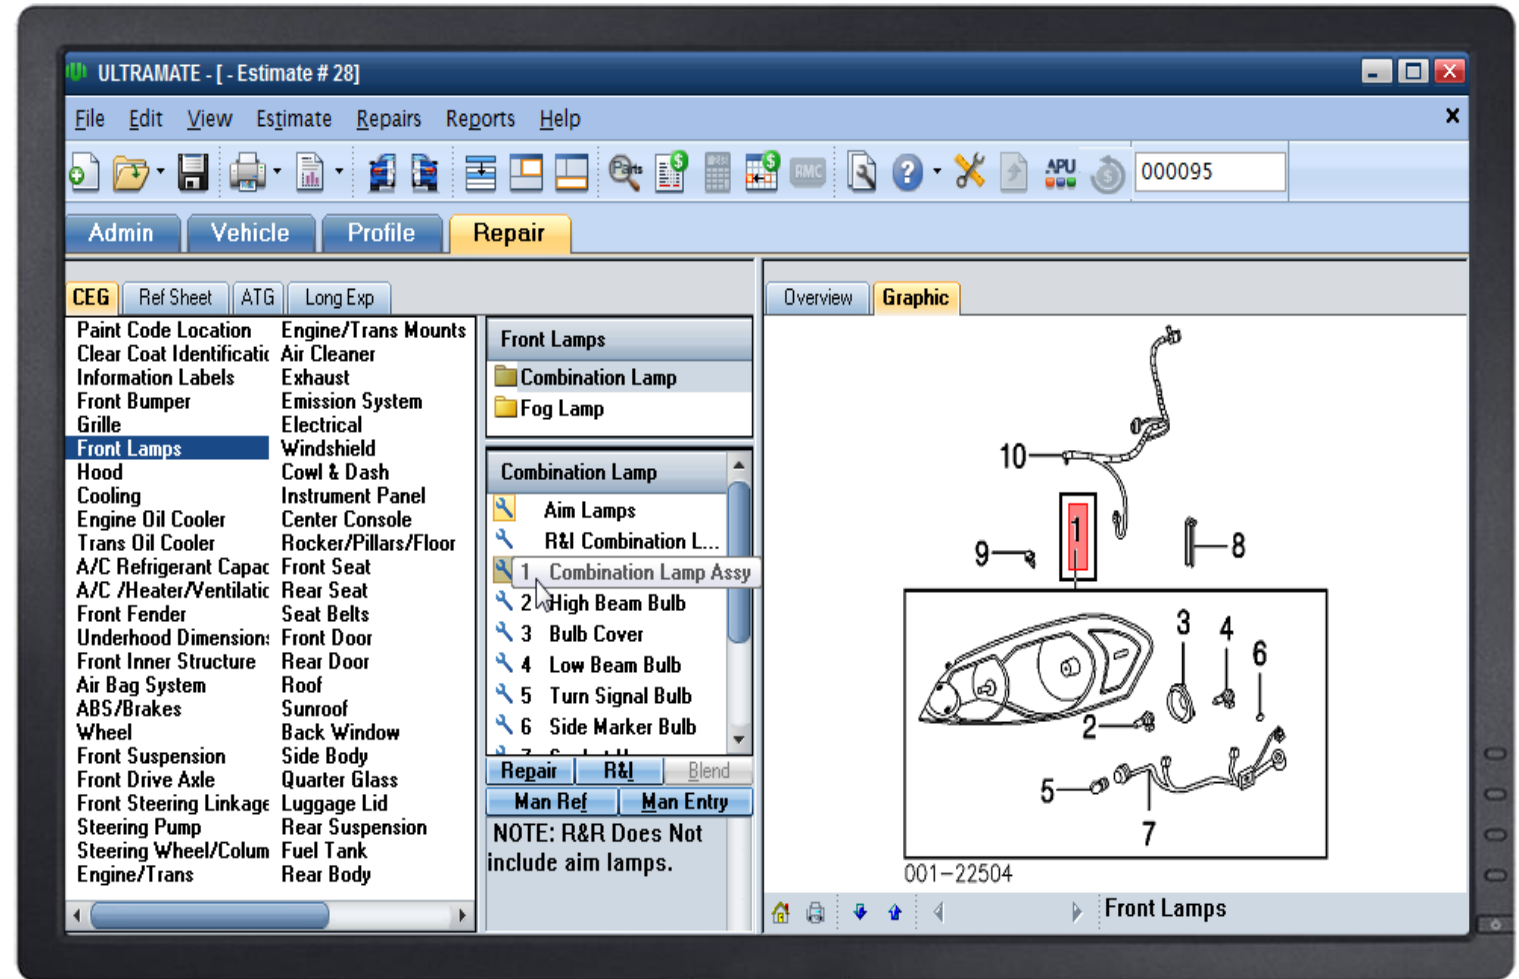

While Internet enabled, MPL pricing is downloaded into Mitchell Estimating. This pricing is stored locally for 24 hours in case offline work is required.

MyPriceLink Integrated Workflow

Add Repairs

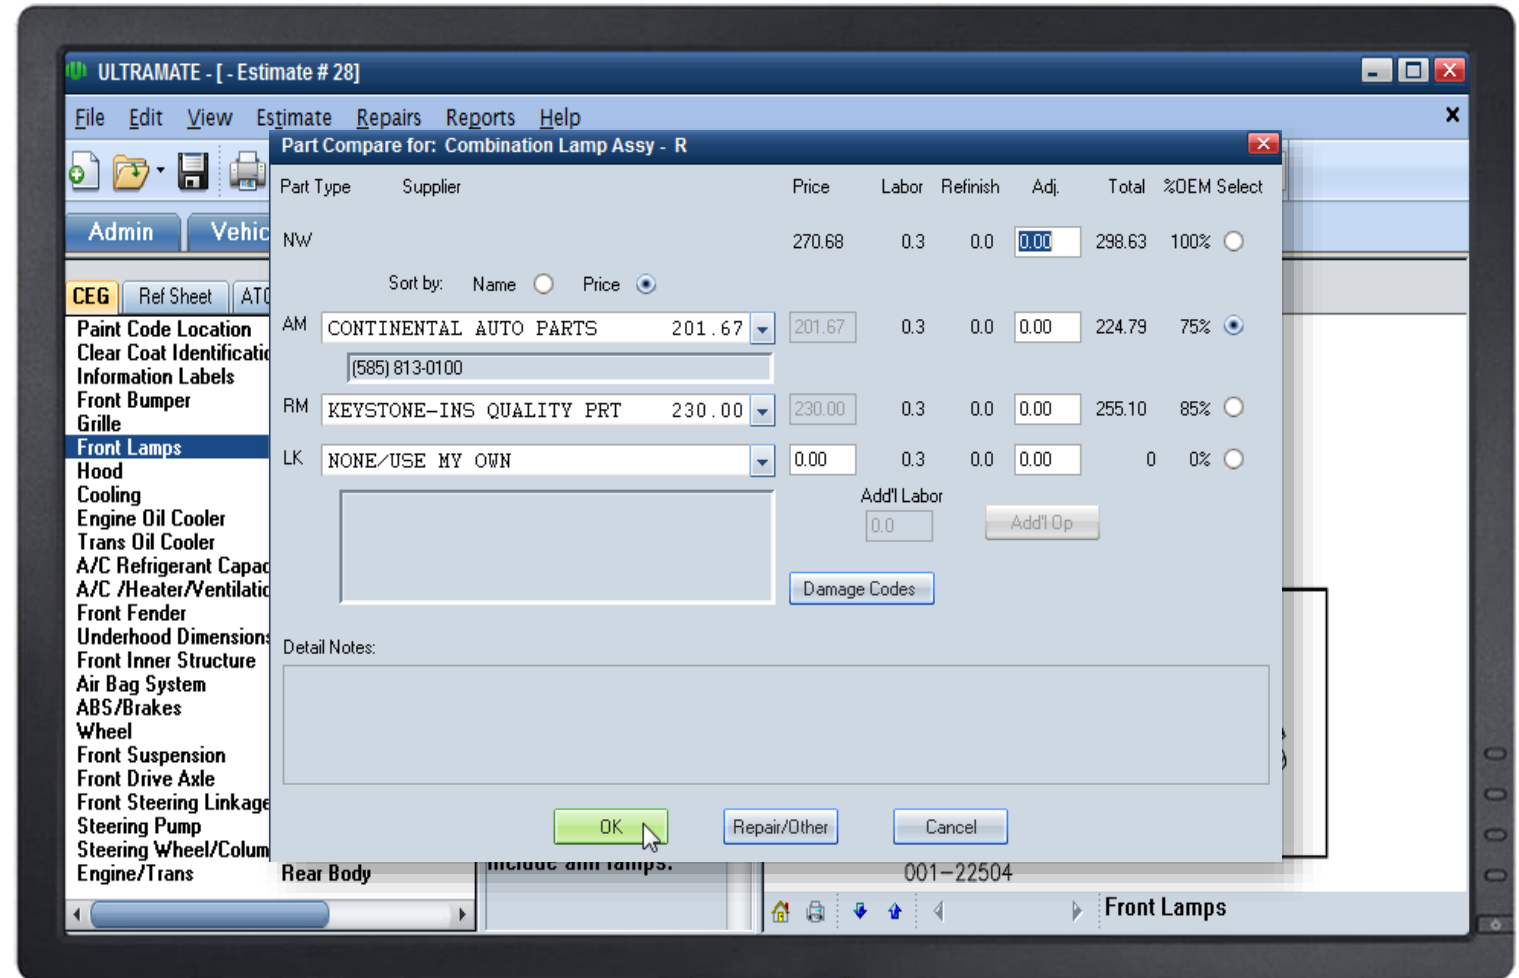

Once MPL pricing download completes, Part prices are displayed through typical workflow. **Select the Part and Determine the Repair Operation.**

MyPriceLink Integrated Workflow

Compare Parts

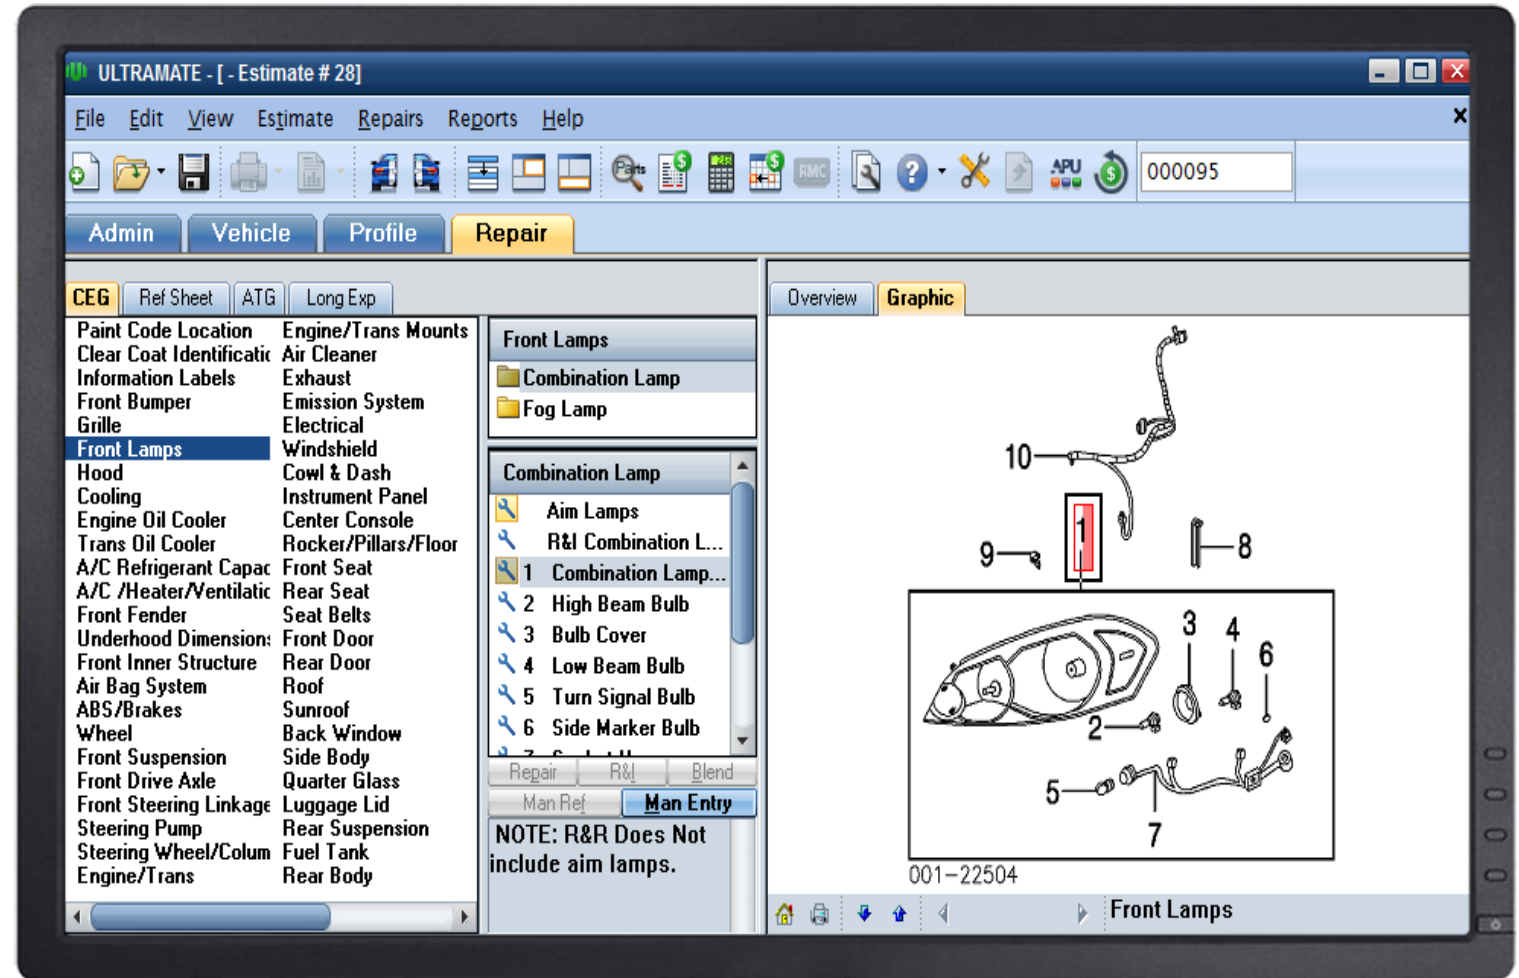

Part Compare behaves the same.
MPL part prices are listed as NW.

MyPriceLink Integrated Workflow

Complete Estimate

MPL Repair Lines are managed the exact same way as non-MPL lines.

MyPriceLink Integrated Workflow

Save/Commit Estimate

- Upon Save/Commit, **Mitchell Estimating contacts MPL to receive a Quote ID** and stores item on Right Top Margin of each estimate report page.

MyPriceLink Integrated Workflow

Internet Access Unavailable

What happens if ... no internet?

User will receive a prompt if unable to access MyPriceLink. Please verify Internet is connected and try again. \$0.00 price will be displayed for any MPL parts on the vehicle. Users would need to consult dealer for list price, if connectivity cannot be restored.

Once Internet has been re-established, select the Refresh icon to retrieve MPL Pricing. Internet is required to retrieve Parts Pricing and create/update a Quote ID.

Note: Once pricing is downloaded, it is saved for 24 hours locally, so users can work offline to actually write the estimate.

Workflow Introduction

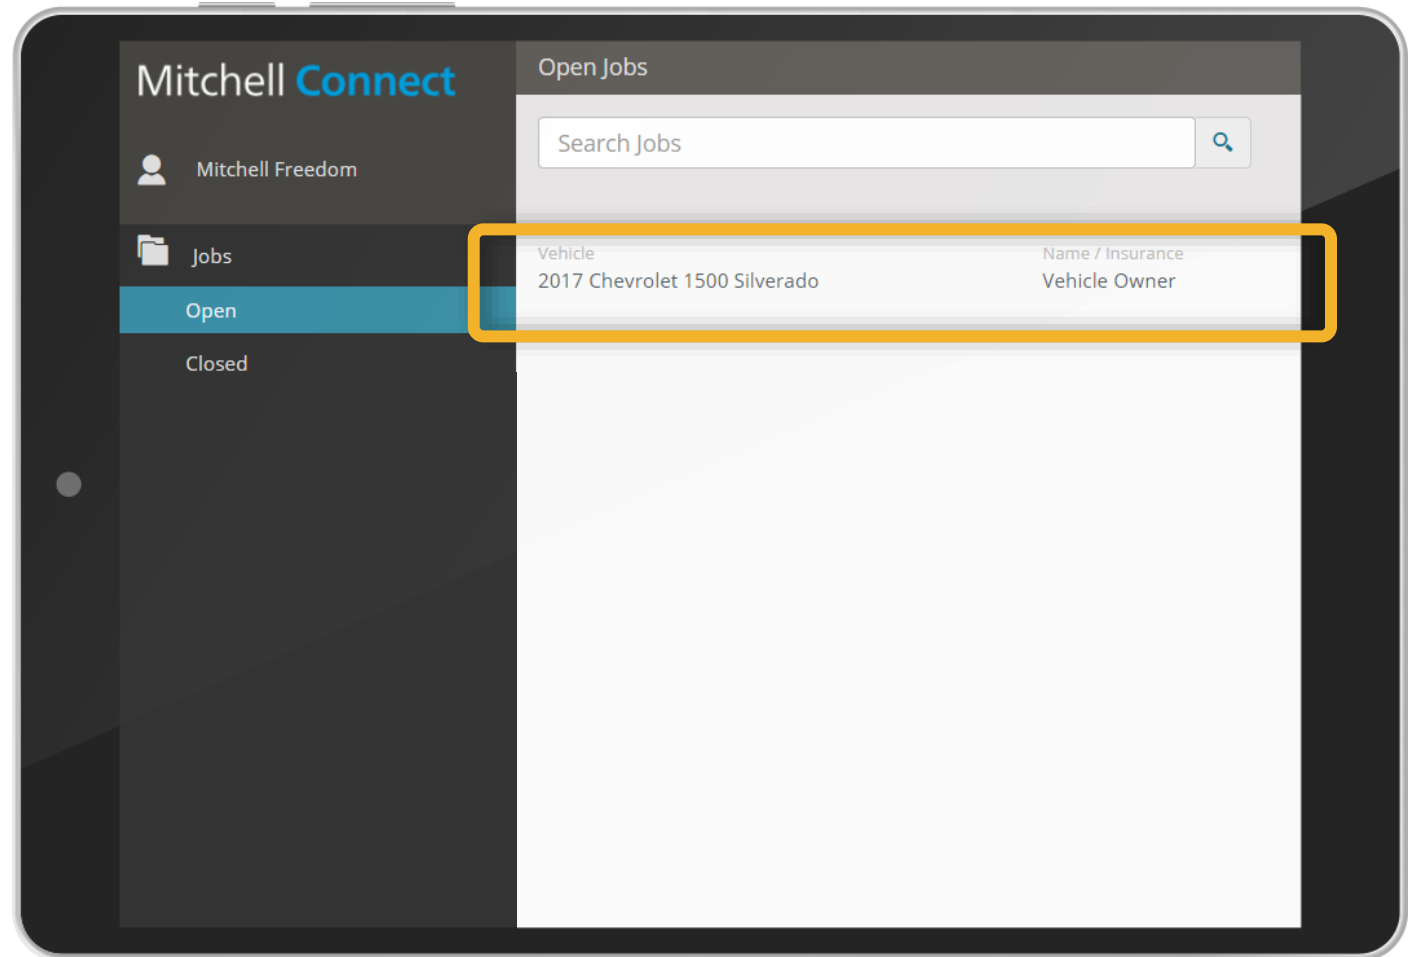

Mitchell CloudTM Estimating

MyPriceLink Integrated Workflow

Start Estimate

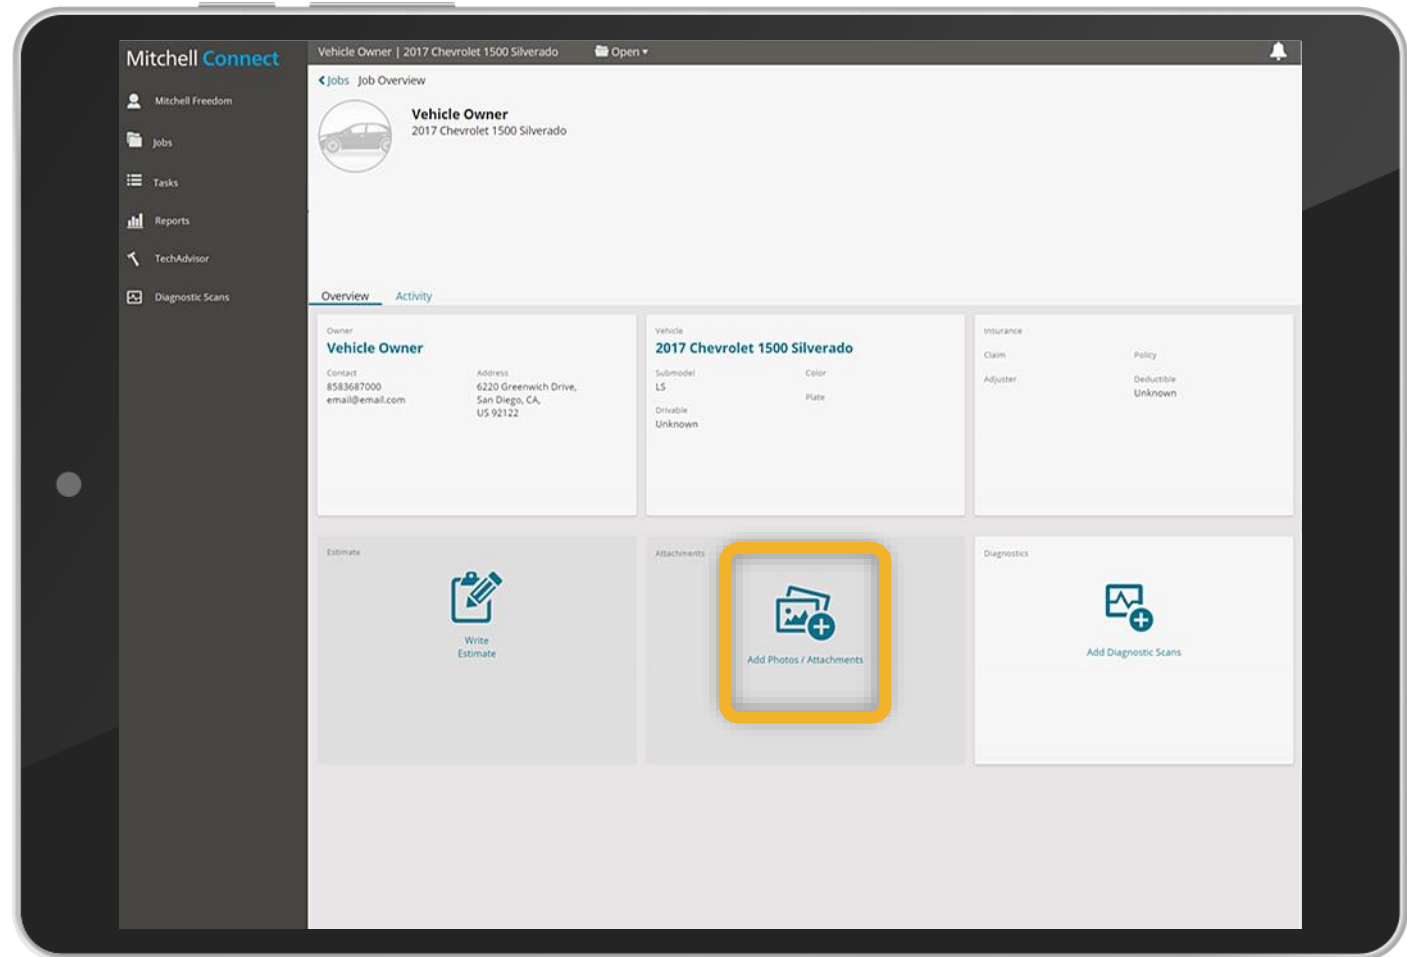

Open Assignment
or Estimate
in Mitchell Connect

MyPriceLink Integrated Workflow

Start Estimate

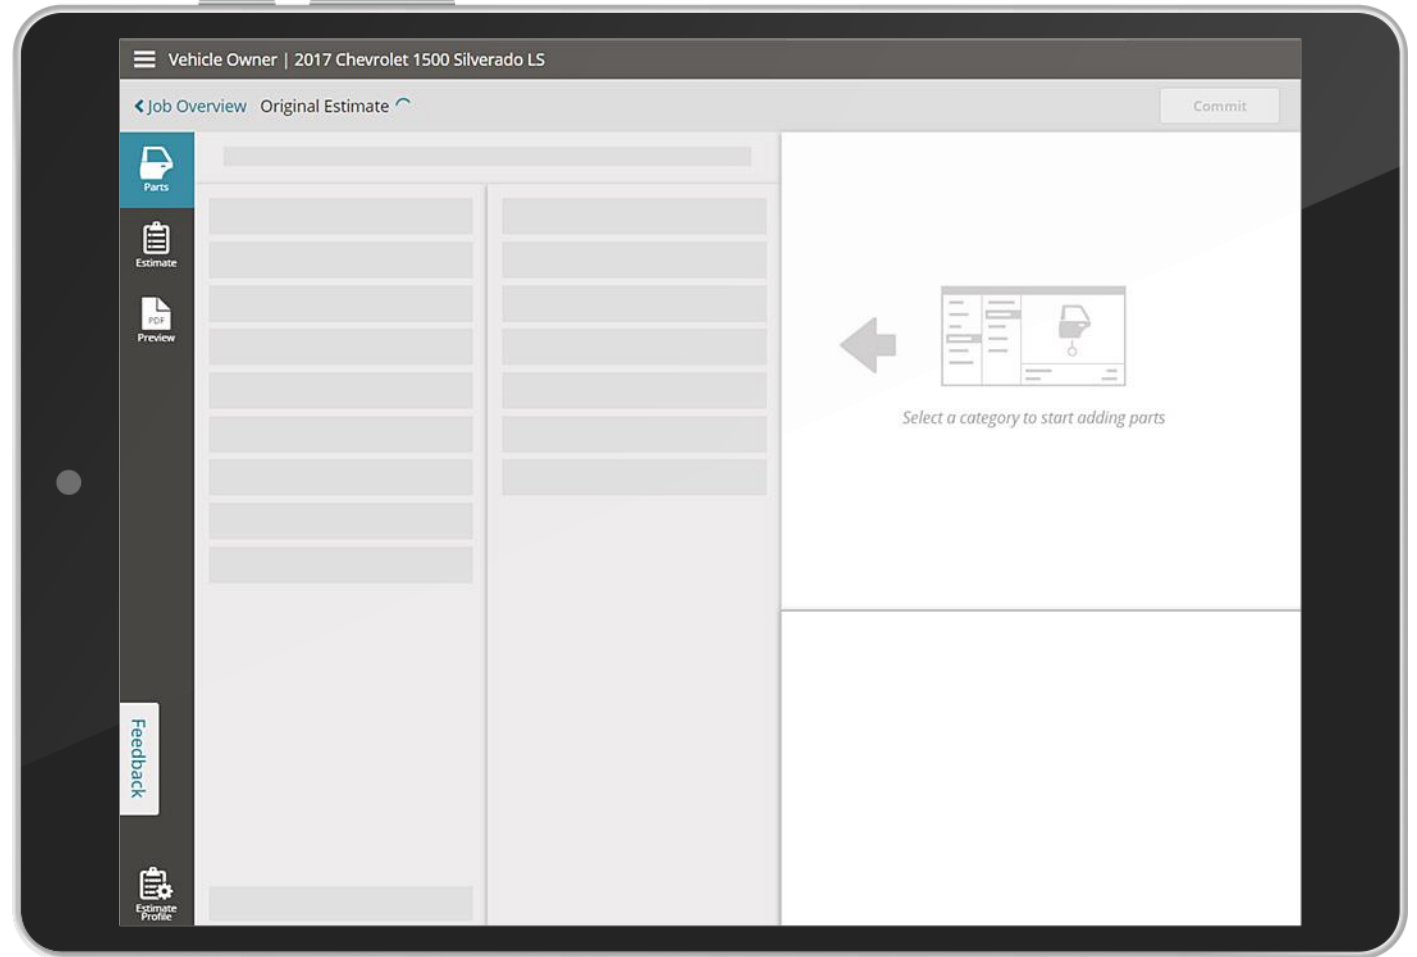

After identifying the vehicle, the user clicks the **Write Estimate Button**

MyPriceLink Integrated Workflow

Retrieve Pricing

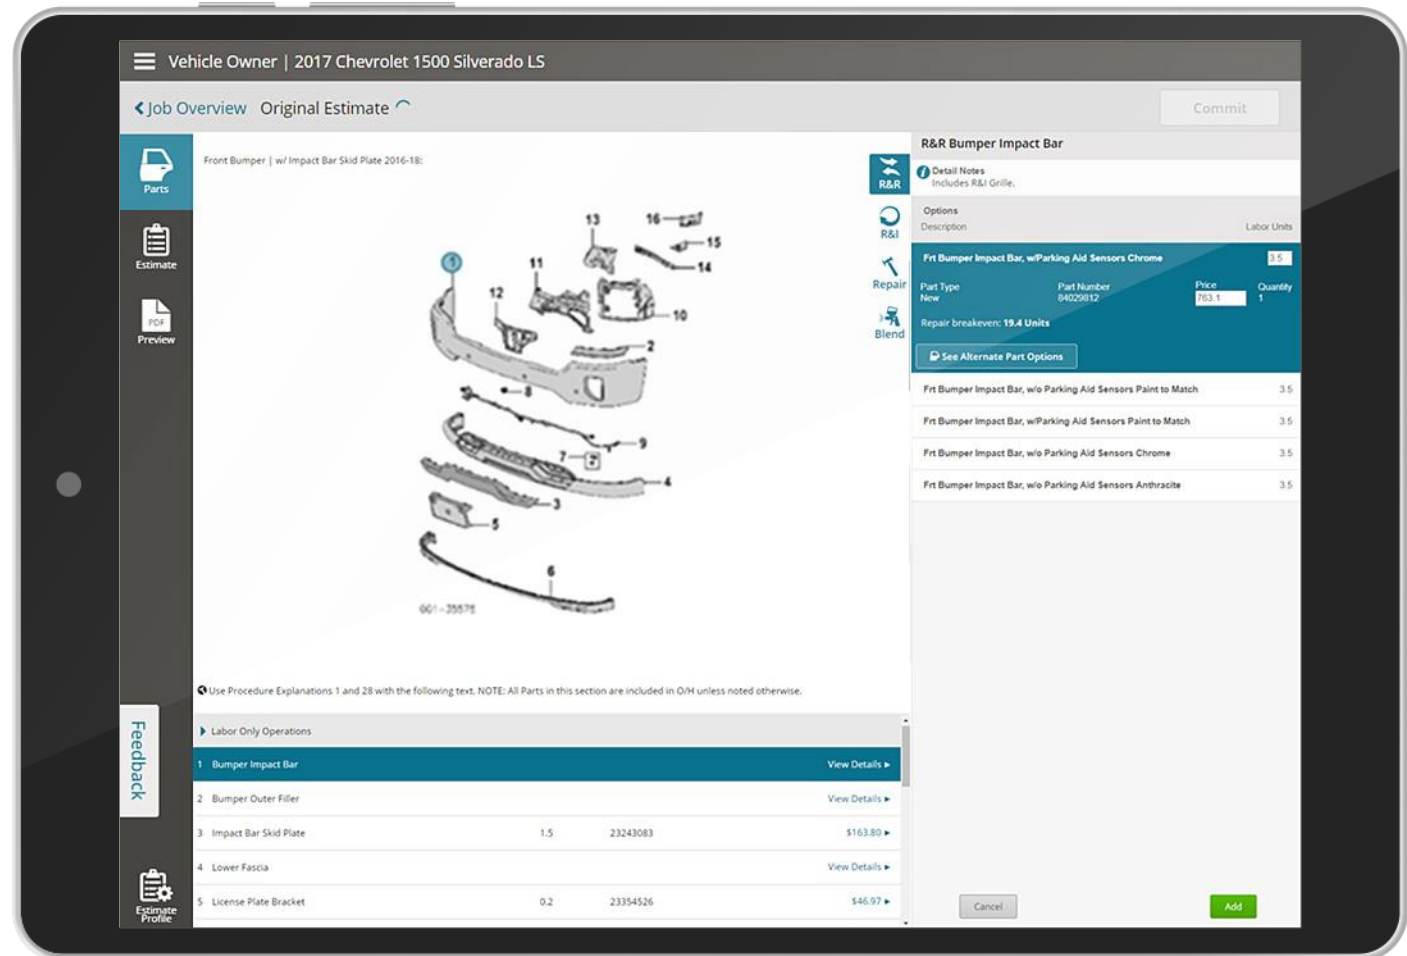

The parts and pricing will load automatically

MyPriceLink Integrated Workflow

Adding Parts

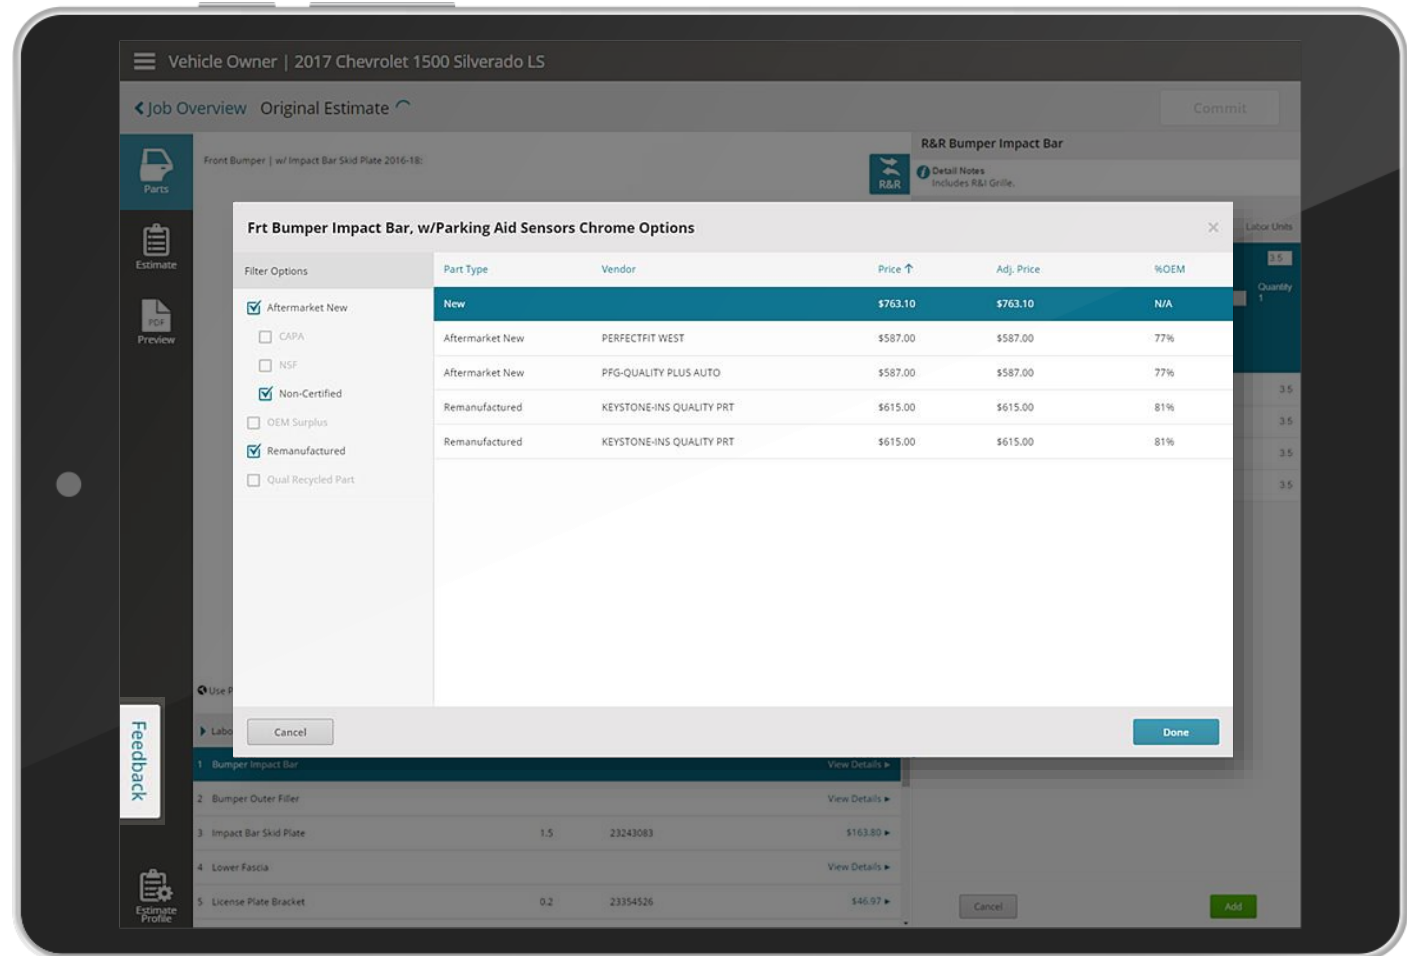

OEM Part Pricing
will appear for
the MPL parts

MyPriceLink Integrated Workflow

Compare Parts

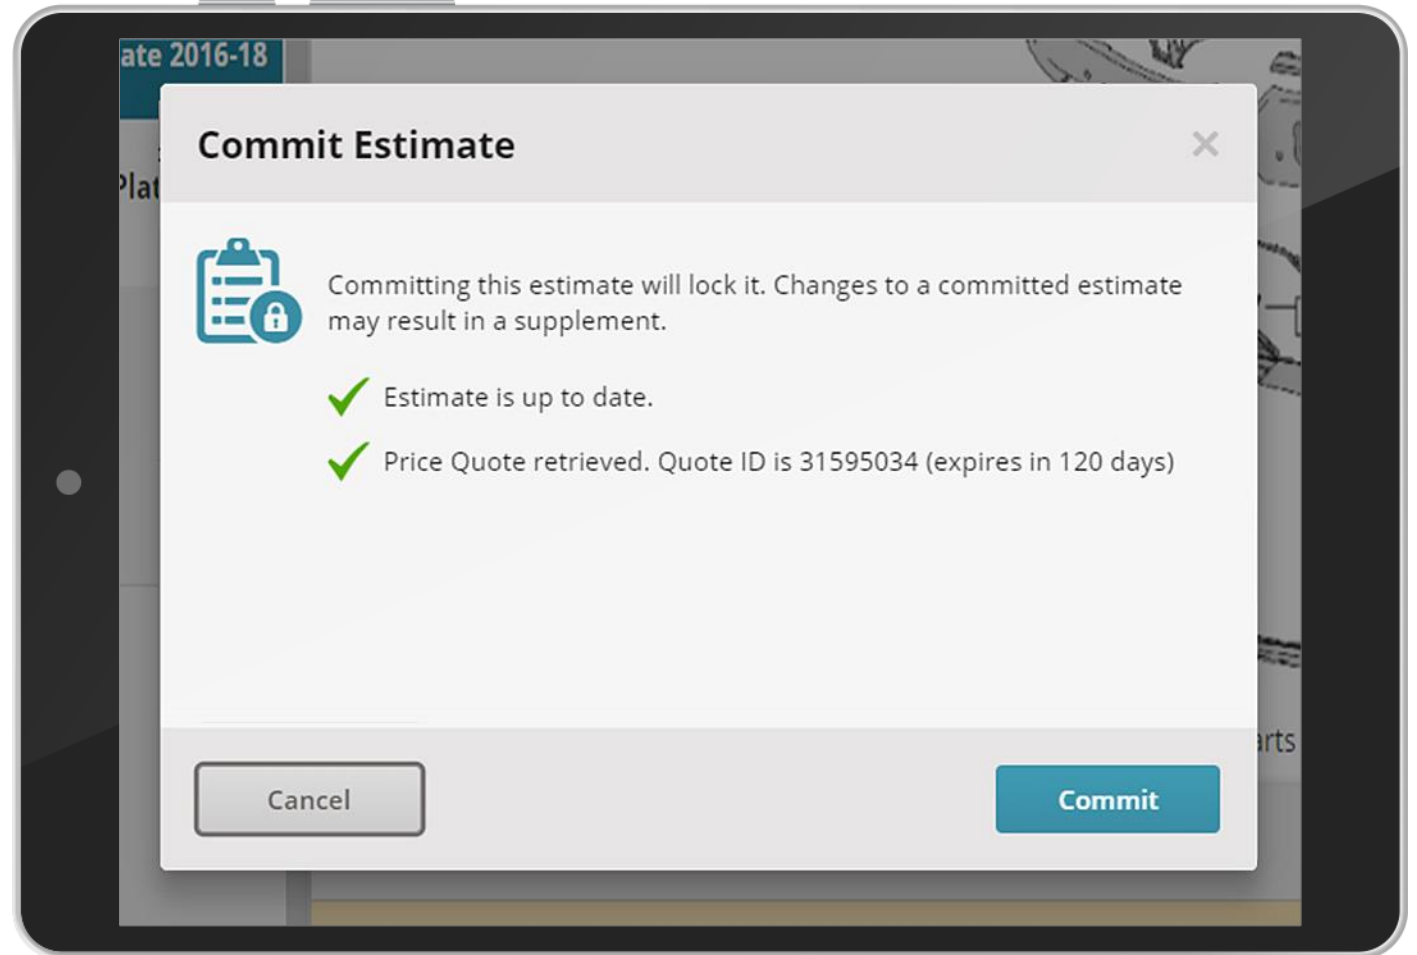

OEM New Part Pricing
will appear at the top
of the list, and all
other part choices
will be listed

MyPriceLink Integrated Workflow

Commit Estimate

Upon hitting the Commit Button, [Mitchell Cloud Estimating contacts MPL](#) to receive a Quote ID and stores it in the footer. The quote is obtained before you commit, so you can always Commit the estimate later.

MyPriceLink Integrated Workflow

Shop Orders Parts Via Quote ID

Collision Shop contacts Authorized Dealers and references Estimate Quote ID, or VIN, so the dealer can reference the pricing that was provide via MPL.

MyPriceLink Integrated Workflow

Error Scenario

If you are unable to connect to MPL for real-time pricing, an error message will display with a **Retry Button**.

An estimate can still be written, if internet is still working, but MPL parts will show \$0.00 on the estimate until a connection to MPL is restored.

MPL Implementation Milestone

June 22, 2018

Ford MPL Integration will be live for all **Mitchell Estimating**, and **Mitchell Estimating Cloud** users. All data elements and workflows will match existing workflows for GM.

- UltraMate users will need to install June release of UM to have the functionality activated.
- The implementation will only impact a limited number of parts from 6/22/18–10/01/18

October 1, 2018

Ford will likely expand the number of parts after the 10/01/18 timeframe.

The integration has been in use since 2015, so we do not anticipate any impact to workflows, or support queues.

Thank you.

(m)powering better outcomes
