

Mitchell RepairCenter™ FastPhoto Manager

Advanced Photo Management System

1 Scan.

FastPhoto's bar code technology automatically links your photos to your repair order or estimate.

SAVE TIME

Automatically sort, size, organize, load, and link your photos to repair orders and estimates - eliminating time consuming manual processes.

2 Snap.

Easy-to-use, ruggedized digital camera makes documenting damage and repairs a snap.

SAVE MONEY

Visually capture all damage information, including supplement, pre-existing and misplaced items, to include in claims documentation.

3 Send.

Instantly sorts, sizes, and loads your photos wirelessly for easy sharing with customers and carriers.

ACCELERATE YOUR PHOTO MANAGEMENT PROCESS

RepairCenter FastPhoto Manager helps you save time by automatically linking vehicle photos to the correct repair order or estimate. With the simple click of a button on the camera you can organize all of your vehicle photos. As the industry's first photo management tool to be seamlessly integrated within the RepairCenter Shop solution and other popular business management systems, FastPhoto Manager is easy-to-use with any of the tools you've chosen to help run your business.

With the system's built-in bar code reader and wireless transfer capability, your team can dramatically speed up vehicle intake procedures and even process multiple vehicles simultaneously without having to shuffle paperwork and interrupt workflow. If you have multiple locations, you can view photos from all facilities at one central location—imagine the convenience of having access to all your photos in one place.

At-a-Glance: Inside RepairCenter FastPhoto Manager

Leading-Edge Features

Empowering Benefits

<p>Accurately assess damage through comprehensive photo documentation</p>	<p>Increase your accuracy in writing estimates by capturing all existing and supplement damage information to fully document estimate dollars associated with the claim. Improved visual documentation of every vehicle in your shop also helps you reduce misplaced items and pre-existing damage claims.</p>
<p>Document repair status with built-in stage tags</p>	<p>The FastPhoto camera provides optional pre-programmed stages that will document and time-stamp photos throughout all stages of work, from intake to delivery. This ensures quick access to images for on-the-spot proof of work and vehicle condition documentation ready to share with insurance partners, parts suppliers and customers. The system automatically creates two copies of every photo: one for you to view and analyze and another that's already sized and easily sent to insurance carriers.</p>
<p>Instantly transfer photos through secure, wireless technology</p>	<p>Transferring digital photos from the camera is as easy as point and shoot ... just hit the "submit" button on the camera and the photos will be sorted and linked to the correct repair order or estimate. The ruggedized FastPhoto camera is designed to survive the hazards of the shop environment and is simple to use—employees can be trained in minutes. And all photos are backed up daily in the Mitchell data center so the images are always secured and available to you.</p>

WHAT REPAIRCENTER CLIENTS ARE SAYING:

"Prior to FastPhoto, we had to organize photos manually and take the time to move them over one file at a time. Now we can take hundreds of photos of the car and instantly sort them into the correct repair order or estimate. And I can view photos from all my shops at one central location, which is much more efficient."

—Avalon Collision Center, Rancho Cucamonga, CA
