Mitchell **SmartAdvisor**™
Premier Medical Reporting

STATE COMPLIANCE MANAGEMENT IS NOW A STRAIGHT-THROUGH PROCESS

In today's highly-regulated workers' compensation environment, you are seeing state regulatory pressures continue to mount. And the fact is, nobody sees it slowing down. Already states like California, Texas, Oregon, and Florida are stepping up their mandates to make compliance costly and complex. The need for an industry-wide solution that can manage compliance and alleviate increasing costs and complexity has never been greater. Mitchell SmartAdvisor™ Premier Medical Reporting (PMR) is a state compliance management and reporting solution that reduces the complexity, costly fines, and cumbersome nature of complying with numerous state government regulatory requirements. As an integrated part of the SmartAdvisor suite, PMR is specifically designed to be a core compliance tool utilizing automated decision-making features and comprehensive maintenance screens designed to provide efficient and effective medical reporting workflows. Your compliance success will be measured by the reduction in errors and the corresponding savings in allocated resources that come from having more control over your compliance requirements.

PMR'S SPECIAL CAPABILITIES ENABLE YOU TO ACHIEVE:

- **Compliance**
  PMR is a complete workflow solution to help you improve your overall compliance results. It can also be a cost-saving solution to help reduce costly state reporting fines. In Florida, fines can run upwards of $100 per bill per day!
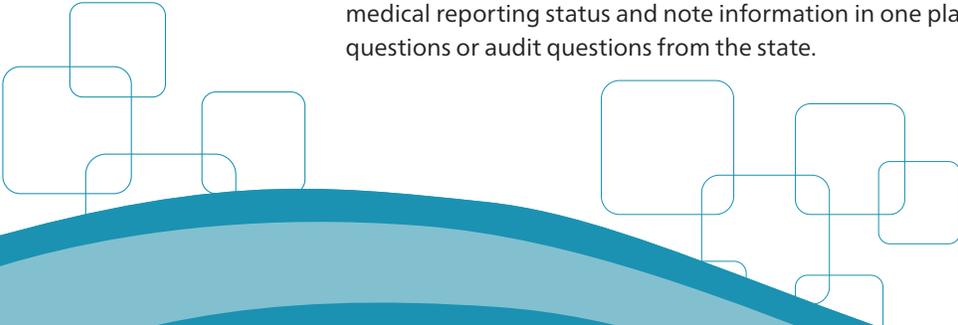

- **Cost Savings in Time Management**
  PMR eliminates managing by spreadsheet, manual searching for rejected bills, long wait times for email updates and toggling between applications to fix errors. It all adds up to a significant decrease in time—and money.

- **Quality**
  Since PMR automatically shows the reasons for each rejected bill, you can address the root causes of the rejections and, at the same time, improve your quality of bills by implementing updated rules and procedures.

- **Ease of Use**
  PMR provides comprehensive screens to work batches, bills, and errors. It also consolidates medical reporting status and note information in one place, making it handy for customer questions or audit questions from the state.

(m)powered

Your End-To-End Compliance Management And Reporting Solution

Mitchell PMR is a key building block within SmartAdvisor™ to achieve significant cost and time-savings when it comes to state reporting of workers' compensation bills. You can see at-a-glance below the key features and resulting benefits when using PMR as your state reporting solution.

Leading-Edge Features	Empowering Benefits
One location within SmartAdvisor for all state reporting functions	This central source saves time by eliminating multiple report runs, and allows staff to access different management screens based on job function for greater efficiency.
User-friendly batch management capabilities	Provides real-time information on batches (file-by-file) for efficient batch management. Filters by state to support user workflows and provides search capability. Views of data speed user to the right information. Includes export function in order to share certain information. Can view acknowledgement status and set the whole batch to re-eligible with one click.
Bill management workflow	Drop-down search criteria cover the most common scenarios for fast finds. Manage bills by "Paid Date" for timely filing. View bill counts for metrics gathering, plus see error counts. Include "Bill Notes" and view "Bill Change History" to prepare for audits.
Comprehensive bill history screen	View history of all changes made to the bill after posting. Know who made the change, when the change was made and see the value before and after the change. Visibility into when the bill went out to a bridge and returned.
Manage skipped and rejected bills in one location	Avoid cumbersome paper reports with PMR's new "Pend Queue" where all skipped or rejected bills can be found along with reasons for rejection. Export erred bills to start tracking patterns and update processes accordingly to increase overall quality. Fast, easy access to open any bill from this portal saves time. See errors as bills are fixed, and eliminate the time it takes to toggle between applications. Release pend to auto-reset bill for export.
