Mitchell Technology to Power New Virtual Estimating Service from Collective

October 16, 2024
2 MIN READ

The program's U.S. market introduction follows a successful, multi-year pilot program.

SAN DIEGO, Calif.—Mitchell, an Enlyte company and leading technology and information provider for the [Property & Casualty \(P&C\) claims](#) and [Collision Repair](#) industries, today announced that its software solutions are powering a new virtual estimating service from [Collective Sourcing, LLC](#). Created for U.S. auto insurers, the service is designed to reduce claims processing time by combining Mitchell's damage appraisal technology with auto technical specialists at Collective. From vehicle photos, these specialists produce estimates on demand—assisting carriers in their delivery of a more streamlined, digital claims experience.

Prior to introducing Collective's virtual appraisal service, the two companies completed a multi-year pilot program in the insurance industry, generating more than 300,000 estimates nationally.

“The estimating process is the most important driver of a policyholder's digital satisfaction. However, insurers are meeting customer expectations just 35% of the time, according to a recent J.D. Power study,” said Collective's Managing Director, Jeff Waack. “The use of our on-demand estimating service with Mitchell's technology, can help carriers exceed consumers' digital delivery expectations for far less expense than traditional appraisal methods.”

Collective uses Mitchell's advanced [Guided Photo Capture](#), [WorkCenter Assignment](#) and [Cloud Estimating](#) solutions. With these solutions:

- Consumers can quickly submit vehicle photos through an insurer-branded web application.
- Carriers can automatically route assignments to Collective.
- Collective's skilled and licensed auto technical specialists can efficiently generate virtual estimates.

“The launch of this on-demand estimating service is yet another example of the value that Mitchell and its technology bring to auto claims handling,” said Scott Kozak, senior vice president of insurance client service at Mitchell. “Through our collaboration with Collective, we look forward to helping P&C carriers in the U.S. reduce settlement time, enhance policyholder satisfaction, minimize claim costs and safely return vehicle owners to the road.”

About Mitchell International

Headquartered in San Diego, Calif., Mitchell International, Inc. delivers smart technology solutions and services to the auto insurance, collision repair, disability and workers' compensation industries. Through deep industry expertise, connections throughout the insurance ecosystem and advanced technology such as artificial intelligence and cloud-based solutions, Mitchell helps its customers and clients to succeed in today's ever-changing environment. Each month, Mitchell processes tens of millions of transactions for more than 300 insurance providers, 20,000 collision repair facilities and 70,000 pharmacies. Its comprehensive solution and service portfolio empowers clients to restore lives after a challenging event.

Mitchell, Genex and Coventry have aligned their joint industry expertise and advanced technology solutions to form Enlyte, a parent brand with nearly 6,000 associates committed to simplifying and optimizing property, casualty and disability claims processes and services.
