On Demand

Originally presented on April 17, 2025, this one-hour [CIECA](#) broadcast features Ryan Mandell, director, claims performance for Mitchell. During the free CIECA webinar, Mandell talks about the impact that escalating trade tensions are expected to have on the auto insurance and collision industries. In addition, he shares the latest updates on the growing global conflict and how it is affecting carriers, repairers and OEMs when it comes to:

- New and used vehicle values
- Claim costs and cycle time
- Total loss thresholds
- Parts selection for repairable automobiles
- Changes in consumer behavior

Also included in the discussion are mitigation strategies for lessening the impact of tariffs on businesses in the collision industry.

Trends in Medium- and Heavy-Duty Collision Repair

[Ryan Mandell](#), Mitchell Director of Claims Performance

April 3, 2:00-2:30 p.m.

What are this year's top trends in collision claims and how will they impact you? In this session, we'll explore the current challenges and opportunities facing insurers, independent appraisers, fleet owners,

collision facilities and others responsible for supporting proper and safe commercial vehicle repairs. From the latest data on claims severity, total losses, and parts usage to the impact of new technological advancements on repair processes and cycle time.
